FEI and Quest Technology Management invite you to an exclusive luncheon presentation and data center tour* to learn to recognize security threats and incorporate cybersecurity practices.

*Bring your ID in order to be admitted into this high security facility and attend the presentation.

Cost:
Complimentary
to FEI members,
Strategic Partners
and Guests

REGISTRATION DEADLINE OCTOBER 19

FEATURED GUEST

LuAnna Harmon
FBI, Special Agent

LuAnna Harmon has been on the FBI force for over two decades. She currently is a Special Agent in the FBI's Cyber Division using traditional and evolving law enforcement methods to thwart, track down and apprehend data thieves, and saboteurs who attack the networks of businesses. Agent Harmon's narratives of cases offer insights and a warning regarding the extent of fraudulent internet activity adopted by international criminal organizations facing all of us. Her presentation is not to be missed.

FEATURED SPEAKER

Shawn Davidson
Quest
Sr. Consultant Business
Continuity Planning

Shawn Davidson, Vice President of Enterprise Risk Management for Quest, brings over twenty years of disaster recovery, business continuity, security, engineering, and executive management experience to his role. Shawn leads the DR/BC technology strategy development and planning practice for Quest and its clients.

Q&A

CPE (CPAS):

This presentation
qualifies for
2.0 CPE credits

Small to mid-size
businesses are prime
targets for fraudsters.

Too many are unprepared
for the size of the threat
we are now facing.

It's no secret that cybercrime has become increasingly prevalent with losses reaching into the billions. Recently, "WannaCry" ransomware, a malicious software used to control computer systems until the demanded ransom is paid, attacked businesses across the globe entering through email with links to attachments!

At this presentation and tour, we will discuss:

- High-level strategies that are fundamental to safeguard your business
- How you can avoid common security pitfalls including manipulative social engineering schemes like "phishing"
- Why enacting and enforcing company-wide cybersecurity policies are essential and involve executive support
- Real world stories, local and international including active FBI cases

Join us for this exclusive luncheon presentation and tour.
