January 9, 2018 Dinner Meeting

America's Economic Future: Challenges & Opportunities

Dr. Barry Asmus, Sr. Economist, National Center for Policy Analysis

America has been stuck in a low growth economy for almost eleven years. Without one 3-4% growth year and stagnant wages, will lower taxes, energy independence and economic freedom be enough?

Barry will discuss:

- Dividend taxes, capital gains taxes, corporate taxes, income taxes and even death taxes have been rising. Who will take charge in lowering taxes?
- One million oil wells have been fracked, but not one on the million square miles owned by the federal government. The time is now for tapping to this 50 trillion-dollar lottery.
- Economic freedom means less government and less regulation. Free market economics will once again be the ignition switch of productivity, growth and higher wages.
