## Research & Resources

### Articles:

Returning the workforce to a physical location while safeguarding the health and wellness of employees is a key consideration and unlikely to be a one-time event. The need for a thoughtful and effective approach that takes into account new restrictions, physical spacing limitations, and the reality of reduced physical interactions will be critical to long-term success. Gallagher created a framework, laid out in a five-step process, to assist you in the planning and execution process: access the five-step process guide [here](#).
