

## Chapter Tier Structure

FEI is comprised of 65 U.S. Chapters who strive to create a welcoming and stimulating atmosphere for current and new members. Chapters do more than compare notes on pressing business issues - they help establish lasting relationships. Many Chapters participate with local colleges and universities by creating awards programs for students, broadening an awareness of financial management careers. FEI works to create Chapters that maintain relevancy within the financial profession in an effort to produce excellent results by providing value, knowledge and contacts to all FEI members.
